

Moose, Texas, about

March 1914

March 3rd, 1914

Rev. T. Albert Moore,  
40 Wesley Building,  
Toronto.

Dear Mr. Moore:

Many thanks for the letter which you have forwarded to me from Mr. J. W. Hamilton. It contains many interesting suggestions, and I will place it before the Secretary of our Extension Committee. In Minnesota probably this work will be taken up by the University, as it is being done in Wisconsin. Just how far we could follow suit in Ontario at present I am unable to say. To develop work of this kind we should require a very much larger grant from the Government than we now have, and it is just a question whether in view of our school system that most of it could not be better done through the Collegiate Institutes and the Department of Education. However, I will look into the matter more closely. Indeed it has often occurred to me before.

Yours sincerely,

President.
